

MyKitchen: Cooking Made Easy

Abstract

With a rising awareness for health in the community and a dwindling amount of time to achieve it, MyKitchen helps users save time in planning and shopping for meals to cook at home.

Research

- Studied Human-Centered Design Approaches
- Gathered prototype feedback from friends and family
- Researched current Swift development standards
- Evaluated different APIs to find one that best fit our needs

Problem

Cooking at home can be healthier and cheaper but takes too much time and planning

Solution

Our iOS app MyKitchen will allow users to

- Search/Save recipes
- Receive automated grocery lists
- Schedule meals
- Share grocery lists with roommates

Technology

Next on the Table

- Grocery Store APIs
 - Price Finding
 - Inventory Check
 - Route Mapping
- Lazy Meals from Pantry
- Recipe Sharing
