# Login / Sign up

The first view you are greeted with when opening the app are the login pages. (Note: If the app opens to the home page, click the sign out button in the top right). Here, you can choose to sign in or sign up for the app.

# Home

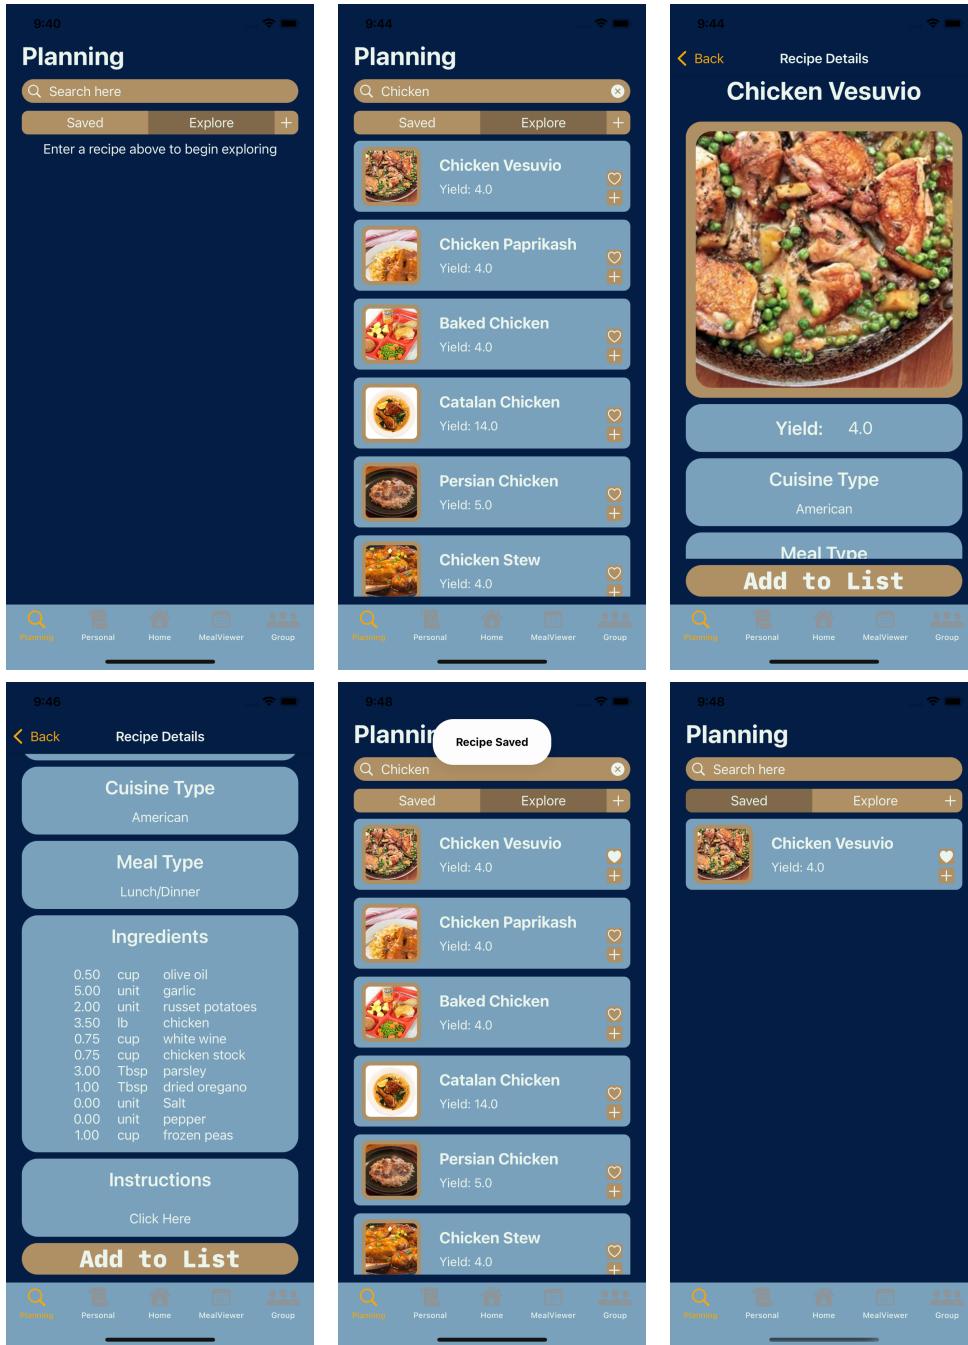

The page below is the home page. You can: click the logout button in the top right to return to the login page, click the planning button to go to the planning page, click the personal list button to go to the personal list page, click the meal viewer button to go to the meal viewer page, click the group list button to go to the groups page, or click the pantry button to go to the pantry list. The “I’m shopping” button will take you to the grocery list section of the application.

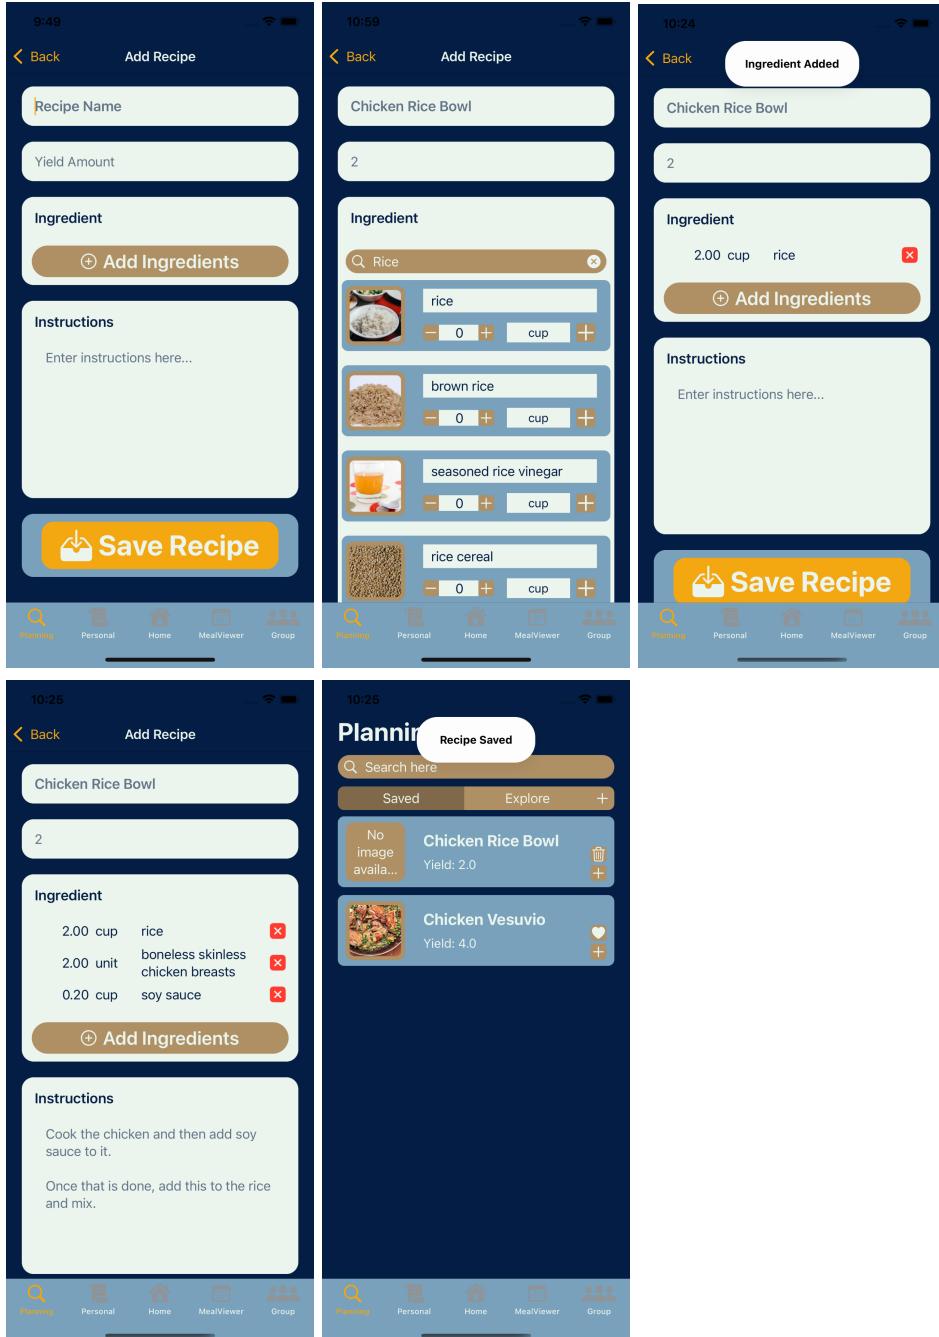

# **Planning**

Below are the planning section pages. You can search for new recipes by typing in the search bar. You can view your saved recipes by clicking the saved button. You can search your saved recipes by typing in the search bar while you are in the saved tab. You can save/unsafe recipes by clicking the heart. You can add recipes by clicking the plus button on the recipe. You can see the recipe details by clicking on the recipe. You can see the add recipe page by clicking on the plus beside explore (the app currently does not support adding recipes). You can also scroll down on the page to get recipe instructions by clicking on the button.

# Personal List/ Pantry List

In the personal list section, you can search your current list by typing in the search bar. You can add a new ingredient by clicking the plus beside the search bar and typing an ingredient name. When you find the desired ingredient, you can click the plus on its card (note the plus and minus quantity works in the normal list, but not on the add ingredient part). To change quantity on the normal list, you can single tap to increment by 0.01, double tap to increment by 0.1, and long press to increment by 1. This works the same for decrement. Lastly, you can delete an ingredient by tapping the trash icon on the card. The last image is of the Pantry List. The pantry has the same functionality as the personal list.

# Pantry List

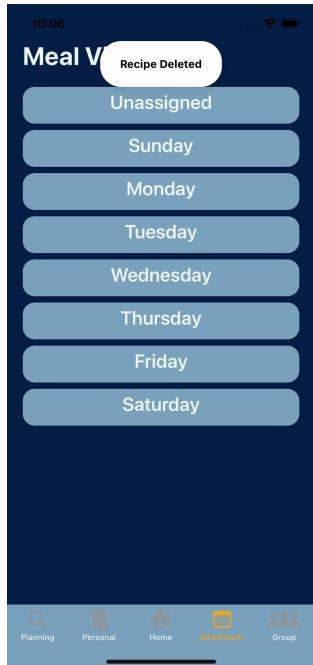

# Meal Viewer

The meal viewer section is where you can decide which day you plan to cook your meals. To change the day the recipe is set to: click the plus on the top right of the meal card, click the name that pops up, and choose the new day. This will move the meal card to the proper day, and then when the user has had that meal or did not make it they can click the trash can to remove it from the meal viewer. This can be seen in the images below.

## Meal Viewer - Deleting meals

# I'm Shopping

The I'm Shopping section of this application allows for the user to view their personal list that they have created from adding different recipes and individual items to their personal list. Then when they pick those items up in the store they can mark them off on the page by tapping on the item. When items are marked off in this list they are automatically removed from the personal list so that the user will not accidentally buy them again on the next trip if they do not need them. This section is also categorized the same as the personal list!

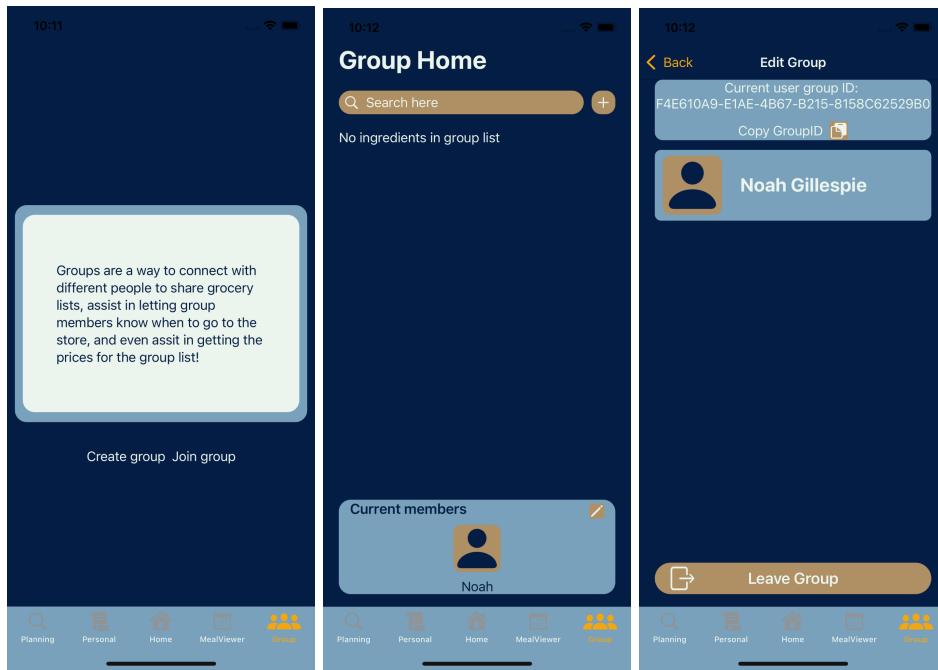

## Grocery list

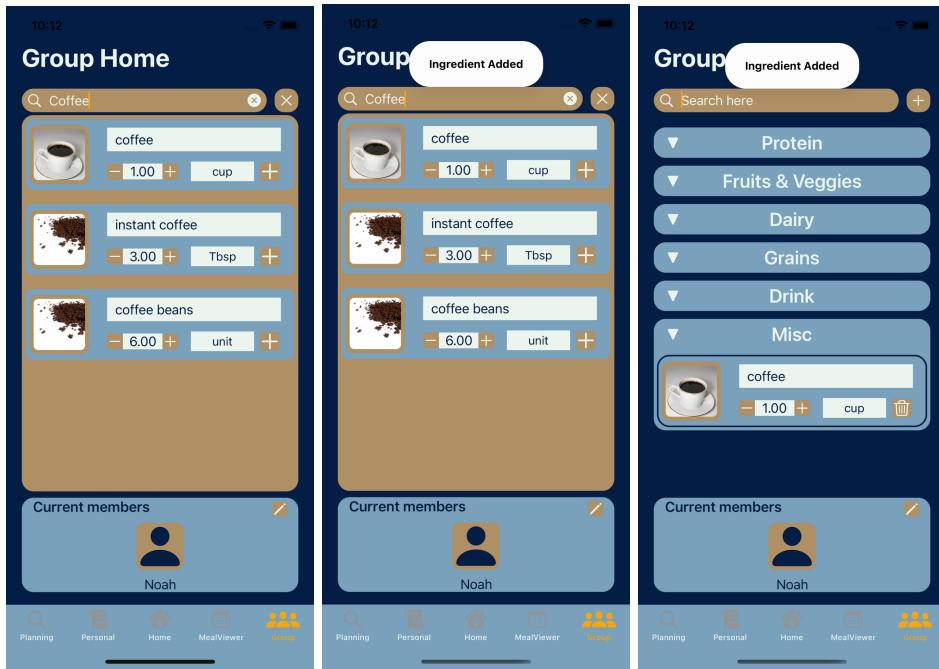

# Groups

The groups section of the app allows users to create groups and invite their friends to that group by clicking the pencil icon in the top right corner of the current members card and copying that groupID and sending it to them. When the other user clicks the group tab they should click join group, and then copy that ID into the text field and click the magnifying glass. Once in a group the users are able to add items to the list by clicking on the plus icon to the right of the search bar and then searching for their items. Once the item is found, like in the other sections of this app the user can change the quantity of the item by clicking the plus and minus buttons and then add it to the list by clicking the plus. If a user ever wishes to leave the group, they just have to navigate back to the members page and click the leave group button on the bottom of the page.
